

FOREWORD

This proceedings volume contains papers presented at the 67th Eastern Snow Conference (ESC) held 8–10 June 2010 at the Jiminy Peak Resort, Hancock, Massachusetts, USA. The general theme of the meeting was “Here today gone tomorrow, the Eastern North America Cryosphere.”

The ESC is a joint United States and Canadian forum for discussing recent work on operational, applied and scientific issues related to snow and ice. It also retains an increasing interest as a symposium where novel approaches to cryospheric science of international significance are presented. The ESC has published an annual series of proceedings since 1952. Typical topics include studies of snow and ice as materials, snow removal, meteorological forecasting, river ice control, snow hydrology, snow chemistry, glaciology, remote sensing of snow and ice, and snow ecology. Membership in the ESC is open to all interested individuals and corporations. Additional copies of the current proceedings and all back issues can be obtained from the Secretary. Additional information about the Eastern Snow Conference may be found at: <http://www.easternsnow.org/>

We continue with an optional review process and authors may submit extended abstracts or full papers to the Proceedings. Participants in the Western Snow Conference (WSC - <http://www.westernsnowconference.org/>) were invited to join the ESC participants in the option to submit papers relevant to winter hydrology to the international journal, *Hydrological Processes*. These papers went through a formal journal review, revision, and referee process and many appear both in these proceedings and in the journal. John Pomeroy (University of Saskatchewan), Kelly Elder (USFS, Ft. Collins) and Andrew Klein (Texas A&M University) edit this special issue of *Hydrological Processes* dedicated to ESC/WSC papers.

We thank members of the Library Sciences and Knowledge Transfer (LSKT) Branch, at the Engineering Research and Development Center, Cold Regions Research and Engineering Laboratory (ERDC-CRREL). Over the years this group has contributed considerable time to this publication and has enhanced the quality of these proceedings. We especially thank Gioia Cattabriga for her effort on behalf of these proceedings.

The 2010 meeting of the Eastern Snow Conference and these proceedings were made possible by sponsorship and Corporate Memberships by:

Campbell Scientific (Canada) Corp.
Edmonton, Alberta, CANADA

We look forward to seeing many of you at the 68th Eastern Snow Conference meeting to be held 14–16 June 2011 at the McGill University Faculty Club, Montreal, Canada. Along with the typical session topics, this year's will have a special session on "Cryospheric controls on biogeochemical processes."

Robert Hellström and Susan Frankenstein
