Niagara River Ice Control By D. M. Foulds	35
Establishment of Precipitation Networks, West Pakistan and Ecuador By Llewellyn L. Cross	46
Patterns of Spring Runoff - Thames River, Ontario By D. N. McMullen	51
Snowfall, Accumulation, and Disposition as Related to the Northeast Drought By William J. Schneider	68
Adhesion of Fragil Ice to Underwater Structures By Gaynor P. Williams	82
Report of <u>ESC. COMMITTEE ON RESEARCH</u>	92

FOREWORD

The Executive Committee of the Eastern Snow Conference is pleased to submit this copy of Proceedings, Volume 12, for your consideration. This is in keeping with the objective of the Conference "to collect, disseminate, and analyze data relating to snow and ice".

The Eastern Snow Conference is an informal group of business men, engineers, foresters, scientists and educators, from Northeastern United States and Canada, which meets annually at some pre-selected location in New England, New York, or Canada. The purpose of these meetings is the interchange of information related to snow, ice, frost, hail, and other phenomena associated with the winter months. The 1967 meeting was held in Niagara Falls, Ontario, Canada. In 1968 the group will meet on February 8 and 9 in the Boston, Massachusetts area.

Membership in the Conference is open to all interested individuals. For the modest annual dues of three dollars, each member receives one copy of the Proceedings, together with any other data released by the Conference.

This volume of Proceedings is made possible through the Cooperation of Ontario Hydro .
