Report of the <u>COMMITTEE ON RESEARCH</u>	128

FOREWARD

The Executive Committee of the Eastern Snow Conference is pleased to submit this copy of Proceedings, Volume 10 for your consideration. This is in line with the objective of the Conference "to collect, disseminate, and analyze data related to snow and ice".

The Eastern Snow Conference is an informal group of business men, engineers, foresters, and scientists, from Northeastern United States and Eastern Canada, which meets annually in some pre-selected location in New York or New England. The purpose of these annual meetings is the interchange of information related to snow, ice, frost, hail, and other phenomena associated with the winter season.

Membership in the Conference is open to all interested individuals. Dues are two dollars per year. For this modest sum a member is entitled to one copy of the Proceedings together with any other data released by the Conference.

As last year, authors of papers included in the Proceedings have been asked to have the text typed on multi-lith plates ready for reproduction and to submit originals of figures, plates, and photographs suitable for reproduction. We hope that this will expedite publication and reduce costs.
