FOREWORD

The Executive Committee of the Eastern Snow Conference is happy to submit this copy of Proceedings, Volume 7 for your consideration. This is in line with the objective of the Conference "To collect, disseminate, and analyze data relating to snow and ice".

The Eastern Snow Conference is an informal group of business men, engineers, foresters, and scientists, from Northeastern United States and Eastern Canada, which meets annually in some pre-selected location in New York or New England. The purpose of these annual meetings is the interchange of information related to snow, ice, frost, hail, and other phenomena associated with the winter season.

Membership in the Conference is open to all interested individuals. Effective January 1963, dues will be two dollars per year as fixed by the Executive Committee at a meeting on June 26, 1962 in response to authorization given it by the Conference on Feb. 8, 1962. For this modest sum the member is entitled to one copy of the Proceedings together with any other data released by the Conference.

This combined volume of Proceedings for two years is possible through the cooperation of Rensselaer Polytechnic Institute. The Committee wishes to thank several individuals who assisted with typing.
