Printed and Bound in Canada

CONTENTS

Foreward	ix
Statement of Purpose	xi
Executives for the 77th Eastern Snow Conference	xiii
President's Page	xv
Life Members	xvi
Awards	xvii

Session #1: Properties of the Snowpack

Simulating Transmissivity of Thin Snow with a Photon-Tracking Radiative Transfer Model <i>TED LETCHER, JULIE PARNO, ZOE COURVILLE, JASON OLIVIER, AND LAUREN FARNSWORTH</i>	3
Spatial Variation of Snow Densities over the Third Pole, Pan-Third Pole and Arctic <i>WENYU ZHAO, TINGJUN ZHANG, YIJING LIU, BENBEN LIANG, YANHUA SUN, AND QING WEI</i>	4
Enabling Comprehensive Low Latency Snow Pit Data <i>PUNEETH YOGANANDA, ROGER DE ROO, AGNELO SILVA, AND RUZBEH AKBAR</i>	5
Sub-Grid Scale Variability of Snow Grain Size in the ABoVE Region <i>SIDDHARTH SINGH AND ANA P. BARROS</i>	6

Session #2: Snow and Ice in the Mountains

The New openAMUNDSEN Modular Snow and Hydroclimatological Modeling Framework: Application to Data from the GEWEX INARCH Rofental Catchment and ESM-SnowMIP Meteorological Stations <i>CARSTEN BECKER, FLORIAN HANZER, MICHAEL WARSCHER, AND ULRICH STRASSER</i>	9
Characterizing Alpine Glacier and Lake Changes in the Cordillera Blanca, Peru from 1987 through 2020 using Multi-Sensor Remote Observations and Random Forest Classification <i>FORREST SCHOESSOW, CHANCE CARAFICE, AND ROHIT MUKHERJEE</i>	10
Quantifying Precipitation Gauge Network Uncertainty in the Canadian Rockies <i>ANDRÉ BERTONCINI AND JOHN W. POMEROY</i>	11
Surface Temperature and Energy Budget of Snow-Covered Complex Terrain <i>ALVARO ROBLEDANO, GHISLAIN PICARD, LAURENT ARNAUD, FANNY LARUE, AND INES OLLIVIER</i>	12

Session #3: Space- and Air-Based Snow Observation

Topographical Controls on Hydrology and Microwave Behaviour of Seasonal Snowpacks: Modeling Framework and Scaling Analysis <i>YUEQIAN CAO AND ANA P. BARROS</i>	15
---	----

Subtraction of Rough Soil Surface Scattering in SWE Retrieval at X and Ku Band using SnowSAR Data from SnowEx 2017 16
Jiyue Zhu, Leung Tsang, Edward Kim, and Do-Hyuk Kang

The Effects of Canopy Structure and Topography on Seasonal Changes in Surface Reflectance Pattern in the Boreal Region of Alaska – Implication for Surface Radiation Budget 17
Bibhash Nath and Wenge Ni-Meister

On the Complementary Value of Space-Based Snow Observations for Snow Mass Estimation within an Observing Simulation System Experiment 18
Lizhao Wang, Barton A. Forman, Sujay V. Kumar, Yonghwan Kwon, Paul Grogan, Rhae Sung Kim, Melissa Wrzesien, and Yeosang Yoon

Session #4: Arctic Snow and Ice

Evaluating the Potential of the Snow Model Crocus driven by in situ and Recent Reanalysis Data for Arctic Applications 21
Daniela Krampe, Frank Kauker, Marie Dumont, and Andreas Herber

Snow Cover Modelling over Complex Terrain of High Arctic at Point and Distributed Scales 22
Hadi Mohammadzadeh Khani, Christophe Kinnard, and Esther Lévesque

Detailed Features of Snow Cover Structure on Hansbreen (Svalbard) in period 2008-2019 based on Radio-Echo Sounding 23
K. Kachniarz, M. Grabiec, and M. Laska

Session #5: Measuring the Snowpack

Evaluation of LiDAR Snow Depth Estimates from Portable Consumer Devices and their Application Towards Advancing Citizen Science 27
Fraser King and Richard Kelly

Evaluating and Improving Northeastern US Snow in the National Water Model by Leveraging Advanced Mesonet Observations: Retrospective Run and Meteorological Forcing Analysis 28
Pat Naple, Justin R. Minder, and Theodore W. Letcher

Quantifying Precipitation Undercatch in a Citizen Scientist Weather Observation Network 29
Maria M. Silver

Accuracy Assessment of Snow Depth Measurements in Forested and Agricultural Environments by an Unmanned Aerial Vehicle (UAV) LiDAR 30
Vasana Dharmadasa, Christophe Kinnard, and Michael Baraër

Discussion: Canadian Historical SWE Dataset

Canadian Historical Snow Water Equivalent Dataset (CanSWE): Recent Update (1928-2020) and Future Directions 33
Vincent Vionnet, Colleen Mortimer, Mike Brady, Louise Armal, and Ross Brown

Poster Session

Evaluation of the Coupled Hydrology Land-Surface Model (MESH) for High-Mountain Snow and Glacier Process Simulation	37
<i>ABBAS FAYAD AND JOHN W. POMEROY</i>	
Winter CO₂ Fluxes Measurements in Northern Environments using a Snowpack Gas Diffusion Method	38
<i>ALEX MAVROVIC, JUHA LEMMETYINEN, CAROLINA VOIGT, JOHANN WAGNER, OLIVER SONNENTAG, AND ALEXANDRE ROY</i>	
Impact of Passive Microwave Radiometry and LiDAR Assimilation on Hydrologic Cycle Estimation	39
<i>ALIREZA MOGHADDASI, LIZHAO WANG, BARTON A. FORMAN, AND SUJAY V. KUMAR</i>	
The Variability of Snow Density Across Ecotypes in the Low-Relief Coastal Mountains of NunatuKavut, and Nunatsiavut Labrador, Canada	40
<i>A. FORGET, R. WAY, R. TUTTON, Y. WANG, N. LE, AND A. TRANT</i>	
Daily Forecasts of Mountain Snowpack using a Snowdrift-Permitting Model	41
<i>CHRISTOPHER B. MARSH, VINCENT VIONNET, KEVIN R. GREEN, RAYMOND J. SPITERI, AND JOHN W. POMEROY</i>	
MODIS does not Capture the Spatial Heterogeneity of Snow Cover Induced by Solar Radiation	42
<i>CHRISTOPHER KINNARD, HAFSA BOUAMRI, ABDELGHANI BOUDHAR, SIMON GASCOIN, LAHOUCINE HANICH, AND ABDELGHANI CHEHBOUNI</i>	
Towards the Incorporation of Adaptive Viewing in Observing System Simulation Experiments (OSSEs) to Preferentially View Snow-Covered Terrain	43
<i>COLIN P. MCLAUGHLIN, BARTON A. FORMAN, AND LIZHAO WANG</i>	
Improving Microwave Volume Scattering Based SWE Retrieval Performance using SnowEx 2017 SnowSAR Observations	44
<i>DO-HYUK KANG, JIYUE ZHU, EDWARD KIM, AND LEUNG TSANG</i>	
Comparison of NASA MODIS / VIIRS Cloud-Gap-Filled with other Satellite-Derived Snow-Cover Maps	45
<i>DOROTHY K. HALL, GEORGE A RIGGS, NICOLO E. DIGIROLAMO, ANGELA M. ERB, AND CRYSTAL B. SCHAAF</i>	
Snow Satellite Mission Concept Considerations, Key Questions, and Needed Tools	52
<i>EDWARD KIM, PAUL HOUSER, AND ANA BARROS</i>	
Scattering Mechanics of Freshwater Ice Derived Through Polarimetric Decomposition from Sledborne Scatterometers	53
<i>G.E. GUNN, A. THOMPSON, AND J. FERGUSON</i>	
Measuring Changes in Snowpack SWE Continuously on a Landscape Scale using Lake Water Pressure	54
<i>HAMISH D. PRITCHARD, DANIEL FARINOTTI, AND STEVEN COLWELL</i>	

History of Winter Carnival Events in College Archives and Snowfall Observations in Williamstown, MA, 1913-2010	55
<i>HAYDEN GILLOOLY AND ALICE BRADLEY</i>	
Comparison of <i>in situ</i> Snow Depth Measurements and Impacts on Validation of Unpiloted Aerial System Lidar over a Mixed-Use Temperate Forest Landscape: A Case Study in Durham, New Hampshire, United States	56
<i>HOLLY PROULX, ELIZABETH A. BURAKOWSKI, ADAM G. HUNSAKER, JENNIFER M. JACOBS, FRANKLIN B. SULLIVAN, MICHAEL PALACE, EUNSANG CHO, AND CAMERON WAGNER</i>	
NASA SnowEx 2020 and 2021 Campaigns in the Western U.S.	57
<i>HP MARSHALL, CARRIE VUYOVICH, CHRIS HIEMSTRA, KELLY ELDER, MICHAEL DURAND, AND ELIAS J. DEEB</i>	
Toward Constraining Mountain Stream Flow Constituents by Combining Citizen Scientist Acquired Geochemical Tracers with Sentinel-1 SAR Time Series in Pakistan	58
<i>JEWELL LUND, RICHARD R. FORSTER, ELIAS J. DEEB, SUMMER B. RUPPER, STEVEN J. BURIAN, YUSUF JAMEEL, HP MARSHALL, GHULAM HUSSAIN DARS, MASOOD ALI, ABDUL GHAFOR, AND AZHAR ZAHEER</i>	
Volume Determination and Area-Volume Scaling on a Small Bolivian Cirque Glacier, Charquini SE	59
<i>J.L. KINCAID, I.D. DOBREVA, AND A.G. KLEIN</i>	
Evaluating and Improving Northeastern US Snow in the National Water Model by Leveraging Advanced Mesonet Observations: Point Simulations and Sensitivity Experiments	60
<i>JUSTIN R. MINDER, PAT NAPLE, AND THEODORE W. LETCHER</i>	
Exploring the History of Snow Research Through the Presentations of the Eastern Snow Conference	61
<i>KRYSTOPHER J. CHUTKO</i>	
Microstructural Characterization of Mid-Latitude Snowpack through Micro-Computed Tomography	66
<i>LAUREN B. FARNSWORTH AND ZOE R. COURVILLE</i>	
Using Cosmic Ray Neutrons to Estimate Snow Water Equivalent in Prairie Environments	67
<i>MADISON WOODLEY, ERIC SPROLES, AND SAMUEL TUTTLE</i>	
Impact of the Spatiotemporal Variability of the Snowpack Conditions on Liquid Water Fluxes	68
<i>MICHEL BARAER</i>	
Variability of Snow Depth Distributions in a Forested Mountain Basin from UAV-Lidar Remote Sensing	69
<i>PHILLIP HARDER AND JOHN W. POMEROY</i>	
Applying the Snow Characterization with Light and Temperature (SCLT) Method to better Understand the Evolution of a Winter Snowpack	70
<i>ROSAMOND TUTTON AND ROBERT WAY</i>	
Global Determination of Snow Cover using Remote Sensing and a Near Real Time Processing Chain	71
<i>SEBASTIAN RÖßLER AND ANDREAS DIETZ</i>	

East vs. West: Contrasting Snowpack Properties in the Weddell Sea, Antarctica <i>STEFANIE ARNDT, MARCEL NICOLAUS, AND CHRISTIAN HAAS</i>	72
High Resolution Spatial Estimates of Average Snow Density and Snow Water Equivalent from Differenced LiDAR Elevations and GPR Travel-Times at Grand Mesa, Colorado <i>TATE G. MEEHAN, AHMAD HOJATIMALEK, HP MARSHALL, ELIAS J. DEEB, DAN MCGRATH, RYAN WEBB, AND RANDALL BONNELL</i>	73
Streamflow Generation and the Importance of Atmospheric Rivers to Annual Flooding for the Coupled Wolverine Glacier-Creek System, Kenai Mountain, Alaska <i>TODD GROTE, ALEX CRAWFORD, AND AARON JACOBS</i>	74
Snow Measurements from the First Two Years of the Coastal Labrador Climate and Weather Monitoring Program <i>YIFENG WANG, ROBERT WAY, ROSAMOND TUTTON, AND JORDAN BEER</i>	75
Sno-Foo Award	77
List of Attendees	79

FOREWORD

This proceedings volume contains papers presented at the 77th Eastern Snow Conference (ESC) held 9 June 2021 as a virtual meeting hosted at the University of Saskatchewan, Canada. The meeting featured oral and poster sessions on recent advances in remote sensing, approaches to snowpack measurement, snow and ice in mountainous and Arctic regions, and snowpack properties. The meeting also included an extended discussion about the Canadian Historical SWE Dataset.

The ESC is a joint United States and Canadian forum for discussing recent work on operational, applied and scientific issues related to snow and ice. It also retains an increasing interest as a symposium where novel approaches to cryospheric science of international significance are presented. The ESC has published an annual series of proceedings since 1952. Typical topics include studies of snow and ice as materials, snow removal, meteorological forecasting, river ice control, snow hydrology, snow chemistry, glaciology, remote sensing of snow and ice, and snow ecology. Membership in the ESC is open to all interested individuals and corporations. Additional copies of the current proceedings and all back issues can be obtained from the Secretary. Additional information about the Eastern Snow Conference may be found at: <http://www.easternsnow.org/>.

We thank members of the ESC executive committee for their continued work toward making each annual meeting a success. This includes, but is not limited to, the work of the Research Committee who evaluate all student presentations and recommend awardees for the three student prizes.

Virtual meeting support for the 2021 Eastern Snow Conference was provided by Media Productions at the University of Saskatchewan in Saskatoon, SK. Special thanks to Don Warkentin and Terry Allington for assisting with the meeting.

The 2021 meeting of the Eastern Snow Conference and these Proceedings were made possible in part by Corporate membership from Campbell Scientific Canada, Geonor, Gradient Wind Engineering, and Hoskin Scientific Ltd. Printing of the Proceedings was supported by the Centre for Hydrology, University of Saskatchewan.

The 78th Eastern Snow Conference meeting will be held 1-3 & 6-8 June 2022 in conjunction with the Canadian Meteorological and Oceanographic Society and the Canadian Geophysical Union. The meeting will be held virtually.

Krystopher Chutko and Eli Deeb
ESC Proceedings Co-Editors
University of Saskatchewan and CRREL

STATEMENT OF PURPOSE

The Eastern Snow Conference (ESC) is a joint Canadian/US organization founded in the 1940s, originally with members primarily from eastern North America. Our current members are scientists, snow surveyors, engineers, technicians, professors, students, and operational and maintenance professionals from North America, the United Kingdom, Japan, and Germany. There is a western counterpart to the ESC, the Western Snow Conference (WSC), which also is a joint Canadian/US organization.

The Eastern Snow Conference is a forum that brings the research and operations communities together to discuss recent work on scientific, applied, and operational issues related to snow and ice. The location of the conference alternates yearly between the United States and Canada, and attendees present their work by either giving a talk or presenting a poster. Most resulting papers are reviewed, edited, and published in our yearly *Proceedings of the Eastern Snow Conference*. In recent years, the ESC meetings have included sessions on snow physics, winter survival of animals, snow and ice loads on structures, river ice, remote sensing of snow and ice, and glacier processes. Volumes of the *Proceedings* can be found in libraries throughout North America and Europe, and the papers are also available through the National Technical Information Service (NTIS) in the United States and CISTI in Canada. All volumes of the Proceedings are now available at easternsnow.org.

* * * * *

Le Colloque sur la neige région Est (ESC) est une organisation américaine-canadienne fondée dans les années '40 et dont les membres provenaient à l'origine principalement de l'est de l'Amérique-du-Nord. Actuellement, les membres, qu'ils soient chercheurs, techniciens, ingénieurs, professeurs, étudiants, et spécialistes des services d'exploitation et d'entretien, viennent non seulement d'Amérique-du-Nord, mais aussi du Royaume-Uni, du Japon, et d'Allemagne. Le Colloque sur la neige-région Ouest (WSC), aussi une organisation américaine-canadienne, est l'homologue de l'ESC pour l'ouest nord-américain.

L'ESC est un forum qui rassemble chercheurs et responsables des services d'exploitation pour discuter des travaux récents sur les problèmes scientifiques, opérationnels, ou autres dus à la neige et à la glace. Le site de cette réunion annuelle alterne entre les États Unis et le Canada. Les participants y présentent les résultats de leurs travaux par des communications orales ou au moyen d'affiches. Ces communications, une fois revues et éditées, sont publiées dans les *Annales de l'ESC*. Dans les années récentes, les réunions de l'ESC ont inclus des sessions sur la physique de la neige, la survie hivernale de la faune, les forces exercées par la neige et la glace sur les structures et les bâtiments, la glace de rivière, la télédétection de la neige et de la glace, et les processus glaciaires. Les *Annales de l'ESC* sont accessibles dans la plupart des bibliothèques scientifiques d'Amérique-du-Nord et d'Europe. Des copies d'articles peuvent être obtenues du National Technical Information Service (NTIS) aux États Unis et son équivalent au Canada, le CISTI. Toutes les volumes des *Annales de l'ESC* sont maintenant disponibles sur easternsnow.org.

EXECUTIVES FOR THE 2020-21 77th EASTERN SNOW CONFERENCE

PRESIDENT

Eli Deeb
Hanover
New Hampshire, USA

PAST PRESIDENT

George Riggs
Gambrills

THE PRESIDENT'S PAGE

After the global COVID-19 pandemic led to both the postponement of the 2020 meeting and the inability to host an in-person meeting at York University (Toronto, Canada), the 77th Annual Eastern Snow Conference convened virtually on 9 June 2021. Despite not gathering in a familiar place as a community, we did enjoy the opportunity to see each other, albeit through computer displays, and engage on what brings us all together: a wide range of snow/ice science, research and applications.

For the 1-day virtual meeting, the organizing committee focused on highlighting student presentations. The scientific program included 5 oral sessions with 21 oral presentations, 30 poster submissions and a discussion session about the recent update to the Canadian historical snow water equivalent dataset (CanSWE). The discussion session included the unique history of compiling the dataset with feedback from the community about this valuable resource as well as continuing the dialogue on how to maintain it for both historical use and future updates. Although we look forward to the day when we will again meet in-person, the virtual meeting did allow many international students and attendees to participate. Despite not hosting a Banquet with a distinguished address and presentation of the Sno-foo Award, we did recognize the following students for exemplary research:

- Daniela Krampe, Alfred-Wegener-Institut, awarded the Wiesnet Medal for best student presentation entitled “Evaluating the Potential of the Snow Model Crocus driven by in situ and Recent Reanalysis Data for Arctic Applications” (Wiesnet Medal and \$750 cash prize)
- Fraser King, University of Waterloo, awarded the Campbell Scientific Canada Prize for “Evaluation of LiDAR Snow Depth Estimates from Portable Consumer Devices and their Application Towards Advancing Citizen Science” (\$500 cash prize)
- Madison Woodley, Syracuse University, awarded the David Miller Award for best student poster entitled “Using Cosmic Ray Neutrons to Estimate Snow Water Equivalent in Prairie Environments” (\$100 cash prize)

The Executive Committee did hold a virtual meeting prior to the conference where we affirmed our commitment to Justice, Equity, Diversity, and Inclusion. We believe that it is critically important to establish these principals within our organization making them cornerstones in our decision-making process for executive, steering, and research committee nominations as well as within our nomination and selection process for awards. This is our opportunity to instill these principals in the next generation of cold region scientists and engineers.

Special thanks to Krys Chutko the Vice-President and Program Chair (for both the postponed in-person meetings and the virtual meeting!) as well as the University of Saskatchewan’s Media Production for providing the virtual platform and technical support for the meeting. Thanks also to ESC Executive Committee Member Ken Rancourt who continues to provide outstanding leadership and is instrumental in the continued success of ESC meetings. As always, thank you to all of the members of the steering and research committees, notably Barton Forman, for virtually organizing the student presentation and poster judging. Likewise, our annual meetings and the ESC organization would not be successful without the participation and continued support of our corporate members: Campbell Scientific Canada, Hoskin Scientific, Geonor, and GradientWind.

As of this letter, we will likely host another virtual conference in 2022 based on uncertainty in travel across North America. Please check the ESC website for updates. Thank you for your participation and continued support. It has been a difficult few years for many of us, but we are in this together. Keep pushing the boundaries of your cryospheric science with the burgeoning methods and technologies available to us now and in the future. And share your work across broad audiences allowing us all to understand better the impacts on our changing cryosphere.

Elias Deeb
77th President, Eastern Snow Conference

LIFE MEMBERS OF THE EASTERN SNOW CONFERENCE

The Eastern Snow Conference gratefully recognizes individuals who have made lifelong contributions to the study of snow and for their support of this organization.

JAMES FOSTER

BARRY GOODISON

GERRY JONES

JOHN METCALFE

HILDA SNELLING

DONALD WIESNET

In memoriam

PETER ADAMS

DON DUNLAP

ART ESCHNER

AUSTIN LOGAN

ROBERT B. SYKES

Wiesnet Medal

The Eastern Snow Conference encourages student research through its Wiesnet Medal. This medal is presented annually to the best student paper presented at the conference.

Year	Winner	Affiliation
2021	Daniela Krampe	Alfred-Wegener-Institut
2019	Zhibang Lv	University of Saskatchewan
2018	Jiyue Zhu	University of Michigan
2017	Caroline Dolant	Université de Sherbrooke
2016	Syed Mousavi	University of Michigan
2015	Nicolas Leroux	University of Saskatchewan
2014	Justin Hartnett	Syracuse University
2013	Andreas Dietz	Earth Observation Center/DFD, Germany
2012	Elizabeth Burakowski	University of New Hampshire
2011	Kathryn Semmens	Lehigh University
2010	Simon von de Wall	University of Victoria
2009	Si Chen	Dartmouth College
2008	Chris Fuhrmann	University of North Carolina at Chapel Hill
2007	<i>Not awarded</i>	
2006	Y.C. Chung	University of Michigan
2005	M. Javan-Mashmool	Université du Québec à Chicoutimi
2004	J. Farzaneh-Dehkordi	Université du Québec à Chicoutimi
2003	Alexandre Langlois	Université de Sherbrooke
2002	Patrick Ménard	Université de Laval
2001	C. Tavakoli	Université du Québec à Chicoutimi
2000	<i>Not awarded</i>	
1999	S. Brettschnieder	Université du Québec à Chicoutimi
